ABOUT MYSELF

I'm a focused, positive, self motivated and hard working person, who is eager to constantly learn and acquire new skills, which is quite evident from the diverse projects that I have undertaken. I'm good at working in a team, and have experience in being a part of several team activities. Having lived and schooled in two different countries, and received exposure to work environments in India, the Middle east and Europe has made me a very adaptable person to any job environment. I would love a job that exploits my knowledge combined with my good communication skills and good academic background to the hilt.

CO-CURRICULAR ACTIVITIES

- Worked on a Finance Project "Performance of Omani Banks in the context of global economic meltdown triggered by actions of International Banks- A brief comparative study" under the guidance of Professor S. Sundararajan, formerly a Professor at Indian Institute of Management Bangalore and presently Director, Morison Muscat Knowledge Centre, Muscat, Sultanate of Oman, an affiliate of Morison International, an internationally known firm of chartered accountants from London.
- Attended summer school on 'Optimisation Mathematics' from University of Joseph Fourier, Grenoble, France to obtain vital complimentary training and to get familiar with state-of-the-art research in the chosen field.
- Worked as a summer Intern under Prof Claudio VITARI, at Grenoble Ecole de Management, France, one of the best business schools in Europe, on the project 'Analysis of statistical validation techniques for IS positivist research'.
- Developed a data logging application using LabVIEW. (a graphical programming language developed by National Instruments, Austin, Texas) and programmed a microcontroller (Rabbit 2000) to measure the speed in rpm of a dynamo using Dynamic C at Captronic Systems, Bangalore while doing the four weeks industrial training.
- Worked as an Intern at the N.S. Raghavan Centre for Entrepreneurial Learning, Indian Institute Of Management Bangalore, arguably the best business school in India, on the project: "Corporate Directors' Interlocks : An Overview from India", a project based on the small world theory.
- As part of the project in "Sustainable Information systems", investigated and documented using system development methodologies like SSADM (structured system analysis and design) and OOAD (Object Oriented Analysis and Design), under Prof. K Chandrashekharan, department of computer science, NITK.
